

FLORAL STUDIES Collections

ARTIST STATEMENT

Have you ever given or received a gift of flowers? For most people, it's rather an emotional experience.

I believe flowers are symbolic for many "opposites":

New life...lost life
Success...disappointment
New love...lost love
Hellos...goodbyes.

Flowers foster memories from the first dandelion picked by a toddler and handed to someone special, to the bouquet caught at the wedding, to the bouquet miraculously appearing in the hospital room, to the corsage pinned on the party dress, to the flower left as a final wish for peace.

I create flowers in my art with deep connection, emotion, and care.
